

Auto-Coiling Machine

Máquina automática de hacer rollos

EN

- Auto-Coiling Machine.
- MMI+PLC control system to produce 100 to 500 meters of single core coils.
- Work in tandem as a take up unit on a PVC wire extrusion line with continuous coiling or independently by using a driven cantilever pay off stand and wire accumulator.

ES

- Máquina Automática de hacer rollos
- Sistema de control MMI+PLC para producir rollos de cable unipolar de 100 a 500 metros.
- Puede trabajar en paralelo como bobinadora en líneas de extrusión con PVC o trabajar independientemente gracias a un desbobinador motorizado y un acumulador.
